

Inline filters are used in hydraulic systems for separating solid materials from the hydraulic fluids and lubricating oils. They are intended for attachment in pipelines.

Your Product Advantages: 110LEN

- Cyclone effect
- Forcing spring for filter element change
- Drain plug from NG0160
- Optional test ports from NG0160
- Modular maintenance indicator with attachable el. Switching part in 4 versions
- Optical maintenance indicators
- Optional hydraulic connections with UNF thread
