

Duplex filters are used in hydraulic systems for separating solid materials from the hydraulic fluids and lubricating oils. They are intended for installation into piping. The filter element can be changed without any operational interruption.

Your Product Advantages: 50FLD(K) and 63FLD(K)

- Cyclone effect
- Dirt trap area to relieve the filter element
- Standard magnetic drain plug
- Leakage-free switch
- Standard measuring point at inlet and outlet
- Standard pressure equalization line from NG 0400 upwards
- Filter cover with lift-out handle for easy handling
- Identical wall mounting and foot mounting for all nominal sizes
- Filter can be emptied completely, no residual oil in the container
- Easily accessible type plate with: Operating instructions
- Lifting eye for easy mounting
- Venting as standard via mini-measurement connection
