

## Hengst oil filter module for Mercedes-Benz.

With the M254 four-cylinder gasoline engine Mercedes-Benz has established a new family of modular engines (FAME). A special feature is an oil filter module developed by Hengst that will help to permanently reduce product variants and production complexity. Designed for system-wide electrification, the new four-cylinder gasoline engine will make a sustainable contribution to achieving the global CO2 fleet targets of Mercedes-Benz.

The eco-friendly and patented Energetic® 7 oil filter insert E159H D311 contributes to sustainability. The oil drain valve is integrated in the module and a seal lock prevents installation of an incorrect filter insert.

### Vehicle and engine filtration

#### Suitable Hengst filters:

Engine	Oil	Fuel	Air	Cabin
M254	E159H D311	LTF	E1462L	E5967LC E5967LB

#### Vehicle application:

Mercedes-Benz C-Class  
(W206) C180, C200  
1.5 Mild Hybrid

**purifying our planet**
